- MS Office Suite

SYDNEY PADGETT

SET DESIGNER

I am an artist passionate about turning stories into immersive themed experiences. My process begins with comprehensive research guided by collaborations with all design departments, including lighting and sound. Utilizing both 2D and 3D computer aided design on a variety of software, I create drawing packages that communicate essential story details while adhering to industry standards and procedures. As production teams bring the show to life, I take a hands-on approach in supporting the creative vision throughout the entire installation. I am ever eager to learn new skills and workflows to improve my methods of experiential storytelling.
